BUILDING PERMIT APPLICATION INSTRUCTIONS

This form applies only within communities where the Department of State (DOS) enforces the Uniform Fire Prevention and Building Code (Uniform Code). Consult your local government officials to see if a zoning or other special permit is also required. Application procedure regulations are contained in Part 442, Title 19 of the Official Compilation of Codes, Rules and Regulations of the State of New York (NYCRR); copies of which are available upon request. A permit will be issued when it is determined that the application is complete and the proposed work conforms to the requirements of the Uniform Code. The authority conferred with the permit may be limited by conditions. The Department of State must be notified of any changes to information contained in the application during the period for which a permit is in effect.

A BUILDING PERMIT IS REQUIRED BEFORE commencing construction or other improvement, removal or demolition of any building or structure (including auction barns, farm residences and other such structures) except as noted below; and BEFORE the installation of heating equipment.

A BUILDING PERMIT IS NOT REQUIRED for necessary repairs which do NOT involve material alteration of structural features, plumbing, electrical or heating/ventilation systems; for agricultural buildings such as dairy barns and poultry houses; for erecting fences, constructing non-commercial storage facilities under 140 sq. ft.; and for replacing roofing or siding materials.

ITEM INSTRUCTIONS FOR THE APPLICATION: (Items not listed are self explanatory. For further assistance, contact one of the offices listed below.)

3C. The tax map or property ID number can be obtained from the local assessor, by consulting the appropriate tax map, or through your county real property tax office. A Certificate of Occupancy will not be issued without this number.

5. Workers' compensation and disability benefits are necessary if wages are to be paid to anyone working on the project.

6. Project cost includes the material and labor costs associated with project work. Not included are architect, attorney, engineer or other fees and land acquisition costs. If the project involves the installation of a mobile or factory manufactured home, do not include the purchase price of the unit. Project costs do include direct costs for wells, septic systems, electrical hook-ups, foundation systems, etc.

7. If unsure of class, check off UNKNOWN or refer to Part 701, 19 NYCRR. Most new single family homes are wood frame construction.

8. Your Town Clerk may be able to help you determine if the project site is in a flood plain or is designated as a wetland. If not, contact the nearest NYS Department of Environmental Conservation.

9. Enter Oil Hot Air, Oil Hot Water, Electrical Baseboard, Wood, etc., as appropriate.

10. THREE SETS of plans and specifications describing the proposed work are to be submitted with the application, in ac-

cordance with the State Education Law, Sections 7307 and 7209. The original seal and signature of a licensed and registered architect or professional engineer must be affixed to ALL plans submitted; except residential buildings under 1,500 sq. ft. of living area, OR for alterations costing under \$10,000. Plans should include site work and landscaping, elevations, sections, dimensions and schedules.

11. Undertaking activity that requires a building permit prior to obtaining such a permit is prohibited. In considering what action, if any, to take in specific cases, the Department will evaluate violations based on prior experience with the applicant and other relevant factors.
